

# eFilePlus Release Notes Changes deployed 10/2/18

## Support for College Routing, Approvals, and Notifications

Functionality released to support routing and approvals at the Dean's Office level. This includes designation of the Dean and Associate Dean Reviewer, and email notifications.

## Updated, faster display of Candidate Reviews page for File Preparer and Dean's Analyst

This functionality addresses a common scenario in which a user is both a File Preparer (for multiple departments) and a Dean's Analyst. The Candidate Reviews page can now accommodate a listing of Snapshots that are in the department level and the college level.

## Bug Fixes and Miscellaneous Improvements

- Fix for teaching import. This resolves an issue causing an error during import of certain teaching records.
- Fixes for employment history. This addresses two issues: 1. An issue causing the system to display "Present" even though the To Date was entered. 2. Fix for data values so that sorting by date works properly.
- Fix for Student Instruction. This resolves an issue when saving a Student Instruction record. If the only role chosen is "Member", the display in the grid mistakenly shows "Co-Advisors, Member".
- Fix for Appraisal Snapshots. This addresses an issue where a difference list was displayed for Appraisal Snapshots.
- Fix for Patents data entry error.
