UCR | eFilePlus Academic Personnel System

eFilePlus Release Notes Changes deployed 10/5/18

Enhanced Support for Reprints

Functionality released to support importing reprints into Snapshots, editing reprints from within Snapshots, and removing reprints from Snapshots.

Updated, comprehensive display for Professional Service

Based on comments and suggestions from faculty and staff, the display of Professional Service and Extension Service in both the eFile and Snapshot has been enhanced to provide each section with its own heading, add button, and grid. This new display doesn't change any of the data, but provides for an easy-to-read table for each section.
