

eFilePlus Release Notes Changes deployed 10/16/18

Bug Fixes and Miscellaneous Improvements

- Document upload timeout fixed. This addresses an issue in which a timeout of 30 seconds could cause document uploads to fail. The timeout has been increased to 15 minutes.
- Label for the Snapshot “Edit” option changed to “Open Review”. This has been changed to better accommodate all users, some who may be able to edit the Snapshot and other users who don’t edit Snapshots.
- Date Received column. The page listing Snapshots for review now contains a column indicating the date each Snapshot arrived in the respective queue. The default order of the list of Snapshots is now ordered by date received.
