

eFilePlus Release Notes Changes deployed 11/6/18

Support for Comprehensive PDF generation

This functionality allows for the creation of a PDF from the CV Overview and merges other review document types into a single PDF. [See KB article for more information.](#)

Support for "tagging" of Snapshots for File Preparers

This optional functionality supports the ability for the File Preparer to "tag" Snapshots. This allows File Preparers to choose unique tags that serve as identifiers and can be used to filter their list of Snapshots. [See KB article for more information.](#)

Support for additional Faculty Reviewers for File Preparers

This optional functionality allows File Preparers to include faculty reviewers from other departments. This is available from the Settings tab and allows the File Preparer to choose faculty reviewers from multiple departments or colleges, not just the home department of the candidate.

Bug Fixes and Miscellaneous Improvements

- CAP Chair/CAP Member/CAP Reader 1/CAP Reader 2 roles now have read-only access to review tags created by CAP Analysts.
- Additional help text for publication citation entry.
- For CAP review, the review now supports splitting the candidate reviews tabs by role instead of group all cap reviewers into one tab. So instead of one tab that says "As CAP Reviewer" it will have multiple tabs for "As CAP Chair", "As CAP Member", etc.
- Fix for the import of Teaching Records into the Snapshot. This increases the width of the import dialog window.
- Updated menu icons for better representation of function
