Undergraduate Research in the Community Opportunities for Faculty

Course Enhancement Services

- Adding a community-based research component to a course

- Improving an existing community-based research component

- Workshops and speaking for classes: community-based research, effective community partnership, capacity building, and more

- Undergraduate community research and learning mini grants available

UGRC Projects

- Faculty can initiate project— get undergraduate assistance for your own community-based research

- Students may approach faculty– mentor students in an established structured context

- Students learn basic skills and are supported in UGRC seminar
