

Recruit Release Notes Changes Launching 2017-10-05

Panorama

Administrators now have a **committee membership auditing tool** that allows them to produce a list and CSV file of all committee members from all recruitments. This will allow admins to discover any committee members that are being overused or overburdened with repeated committee duties.

Committee membership audit

Your workspace ▾ Role

Member name	Role	Resource
Krystal Berge	Committee Chair	Photography Master-IRD (JPF01063)
Charlie Committee Chair	Committee Chair	Chair survey 1 (JPF01063)
Charlie Committee Chair	Committee Chair	Professor of the Dark Arts (JPF01063)
Guy Cao	Committee Chair	Confidant recruiter 2 (JPF01094)

Department	Ad Sources
Department of Laboriosam Delectus	
Department of Laudantium Architecto	<input checked="" type="checkbox"/> test  EXAMPLE_PDF.pdf

It was previously difficult to see the recruitment ad sources for all recruitments. Now that we have added a **column for recruitment ad sources** onto the Recruitments page, it will be much easier to see which ad sources are being utilized, and when compared against other columns, will allow users to determine which ad sources are successfully bringing in diverse applicant pools .

Recruitments

Specializations are a useful tool for narrowing and sorting applicant lists. In order to make this feature even more useful to analysts and committees, we implemented the ability to **search by specialization**. Now, typing a specialization in the search bar will produce a list of associated applicants.

Bugs 'n Stuff

- Tooltips were not always disappearing after a page reload. They will now disappear as expected.
- Fixed an issue where entering optional fields in the recruitment wizard would cause an error
- Fixed an issue where applicants received an error if accessing their diversity survey before logging in
- Upgraded production sites to Ruby 2.3.4
- Added title code
- The help documentation has been updated for applicants - no more old screenshots!
