

Recruit Release Notes Changes Launching 2018-02-08

Panorama

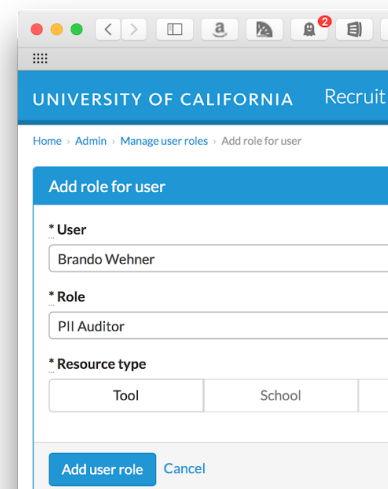

Panorama workspaces allow you to mix and match columns, filters, and sorts into your own custom reports, and the **new Reports page allows you easy access to all your workspaces across the system.** You can now quickly jump to any workspace or download the CSV, all from one page. This new view is available to all Analysts, Admins, Diversity Office, Diversity Office Director, Diversity Analyst, Central AP Analyst, Dean's Analyst, and Equity Advisors.

In addition, we've **converted some of our old reports into workspace templates.** CSV is still just a click away, or you can use a template as a starting point for your own reports. The templates are available to anyone who had access to the old reports.

PII audit tool

We are scheduled to scan for PII again soon, so we're putting the pieces in place to make this process easier for all involved. This sprint we added a new PII Auditor role is available to give campuses access to the admin tool that shows which files have been flagged as potentially containing Personally Identifiable Information.

Bugs 'n stuff

- Fixed an issue where the tooltip on the Response Rate column was showing HTML tags
- Changed the ordering of the Download as CSV button on the Applicant list
- Fixed an issue where CSV downloads were showing unsupported characters
- Updated a broken link for UCSD's Statement of Contribution to Diversity
- Update UCSF's SSL certificate
