

Recruit Release Notes Changes Launching 2016-07-14

Search Waivers

We've uploaded the **search waiver guidelines** links for UC San Francisco and UC Berkeley's production sites. If your campus's search waiver guidelines are finalized, send us the link and we can add it to your Recruit site as well.

Ethnicity Tracking

To finish up the ethnicity tracking project, we have updated the **UCOP Hired Report** to properly reflect hired applicants who have used the newer, more robust diversity surveys.

Bugs and Stuff

- We have removed the CSV download from the applicant breakdown page in order to reduce confusion
- We added a footnote to the Diversity page to indicate that the values do not include applicants who selected "Decline to State" on the diversity survey

- Fixed a table on the Applicant Pool Report's response rate for Basic Recruitments so that it only counts applicants who have filled out the survey
- We fixed an issue where recruitment approval buttons did not disappear after they were clicked by approvers
- We fixed an issue in the Recruitment List CSV download where cells did not properly align with their respective headers when all columns were enabled
- We fixed an issue where the Notify Approvers popup was not cleared of text after delivering messages
- A new column erroneously appeared on the diversity tab for recruitments that do not use the new diversity survey; the column has now been removed
