

eFilePlus Release Notes

Changes deployed May 17, 2018

Student Instruction

The layout of this section has been improved so that no horizontal scrollbar is displayed. The number of columns displayed has been reduced and data from those columns is now displayed in More Details.

Certification

The annual certification has been changed per APO. Faculty will now only need to certify one time, forever.

Manage eFiles, Listings of Active and Inactive Faculty

This enhancement allows File Preparers to better manage their listing of faculty by moving retired or inactive faculty to a separate tab. This allows File Preparers to focus on the active faculty who continue to be reviewed.

Grants

A new status of Awarded has been added, along with date field to indicate the “Date of Award Letter”.

Professional Activities

A column labeled "General Information" was added to the display of these activities. This column displays data related to a professional activity that may be a title, agency, etc. relevant to understanding the item listed.

Bug Fixes and Miscellaneous Improvements

- For Honors / Awards, the “Delete” button has been changed to “Remove” to be consistent across the system.
- Non-Confidential document - An issue affecting records of type “Other Document Type” has been fixed.
- Right-side Navigation Menu – “Back to Top” added and fixes for improved display.
- Patents – Improvements to the handling of dates entered.
