

Recruit Release Notes Changes Launching 2016-11-30

Exemptions has launched!

This sprint marks the last sprint with Exemption stories. You're just about ready to head out into the world and hire/recall more great faculty!

[UC Irvine Recruit] Please conclude your search exemption:

In our penultimate story, Recruit will now **remind analysts to conclude their exemption**, if they have not yet already done so, 1 and 7 days after the effective start date. If your campus would like a different interval, shoot us an email and we'd be happy to set up a custom set of dates.

In our last story to complete the Exemptions project, analysts are now able to **record a candidate's UC employee status**, including:

- whether the candidate is, or has ever been a UC employee
- the site that the candidate was last employed at
- their last employee ID, when relevant

CANDIDATE

* Name

C.V.
 No file chosen

* Employment status
 Current UC employee Past UC employee Retired

We invite everyone who has been following along with Exemptions to check out the launch-ready project on your Training site after deploy. We're ready to go live with the feature as soon as you are, so please contact us to let us know when your campus is ready for Exemptions! If you'd like some time to train analysts on using Exemptions, we will not deploy to your production site until January 8th, 2017.

Committee Chair Survey

In the first story for the Committee Chair Survey story, we've added (and prettied-up) the existing survey to Recruit. It currently does not have a place to live as we are still in talks with our subject matter expert group, but the URL can be found at:

https://RecruitURL.edu/analyst/committee_chair_survey_responses/new

Documentation

The **online helpdocs** and **user manual** have been updated to reflect changes from our last sprint, and all of Exemptions. Feel free to have a look around our documentation while you explore the new feature!

Bugs 'n Stuff

- The Exemptions appointments tab got some finishing touches in preparation for its special day.
- Final Approvers' approve and decline buttons used to disappear after opening their confirmation modal, but now they stick around like they're supposed to.
- Newly created exemptions no longer add erroneous information to their activity log. Similarly, applicant logs don't have erroneous information when deleting applicant files either.
- eTags for Shortlist and Search Reports now update correctly, so you'll always be seeing the most up-to-date PDF.
- We also updated our security subsystems to prevent the "Dirty Cow" SSL vulnerability.
