Recruit Release Notes Changes Launching 2018-03-08

Panorama

| JPF#	Employee ID ▼	Applicant
JPF00750	9890	Two, Tester
JPF00750	890790870	Knowingme, Knowingyou

We've added an **employee IDs column to the All Applications page**. This should allow users to connect hired employees to other systems more easily.

Finding time-limited waivers that have expired used to be a hassle. In order to audit for waiver

SWR#	Candidate name	Employee ID	Expiration type	Effective date	Appointment start date ▼	Expiration date
SWR00169	Gregory	3432223	Time limited	May 2, 2017	Mar 7, 2017	May 31, 2017
SWR00145	Bob Dylan	87654321	Time limited	Oct 8, 2016	Dec 1, 2016	Oct 31, 2017
SWR00150	Mary Bozo	8ui	Time limited	Nov 8, 2016	Nov 8, 2016	Nov 8, 2016

overstays, we added a set of columns that make this information simple to find. Users can **filter by expiration type, category , effective date, and expiration date** from the Waivers page.

When comparing data in the lists, it can be tedious to reorder columns. Now, users will be able to **drag and reorder columns** straight from the page!

PII audit tool

We are capping off our PII Audit Tool project with the addition of the **Replaced filter**. This filter will display all files that have been replaced, giving users an easy way to check their work and to confirm that a file they replaced was actually redacted.

Bugs 'n stuff

- Fixed an issue where user could sometimes not be able to save a workspace
- Fixed an issue where the recruitment grids would not render HTML
- Fixed the inconsistent casing of column headers
- Fixed an issue with repetitive text on Google search result
- Added two title codes for non-physician interns and trainees
