# Recruit Release Notes Changes Launching 2015-03-20

Applicants

We released a **new video showing an overview of the applicant review process**. UCI is using it for training new reviewers, and you can, too.

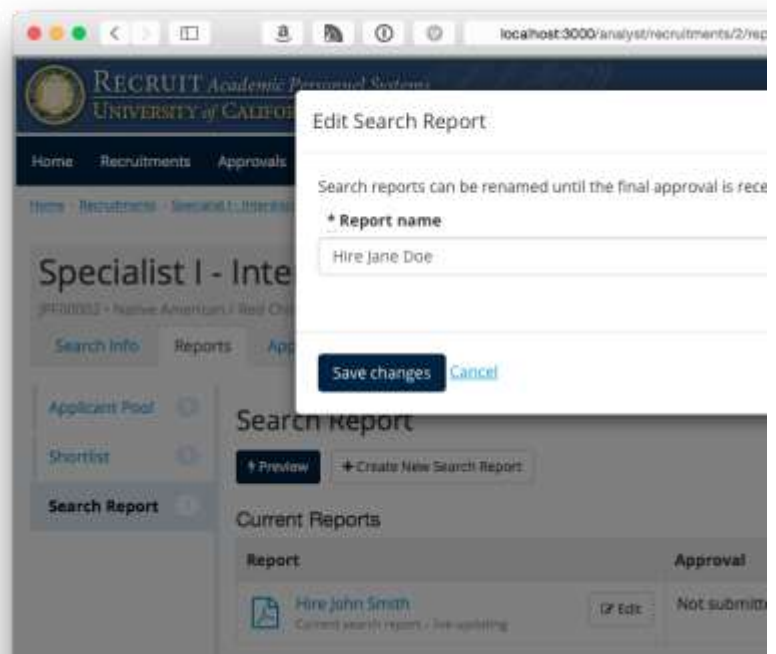

The **Document Viewer got a visual update** that brings it in line with the new style. Viewing large images is now much easier, and seeing what files are and are not available is now possible without jumping back to the applicant review page.

The **applicant bundle file name** now matches the last-name-first format used in the application itself.

Reports

You can now **edit search report names** to reflect the changes made as you move through the recruitment process. Edits can be made until the search report is approved.

Recruitment Information API

Applicants **offer information** is now available.

Notable Bugs Fixed

● Large text areas (Equity Advisor Role, Qualifications, etc) could get truncated in the PDF reports. We have changed the formatting to avoid this error.
