Recruit Release Notes Changes Launching 2015-05-04
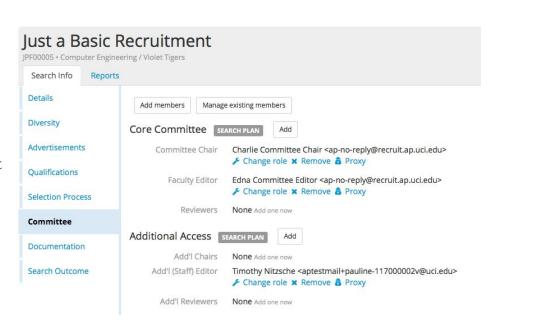

Extra Compliant Edition

We now **require search efforts** to be filled in. "Planned Search Efforts" is required to submit the search plan, and "Actual Search Efforts" is required to generate any of the recruitment reports.

You can now **bulk update disposition reasons and comments**, which will make it much easier for analysts to deal with large applicant pools, especially as we move into a world where disposition reasons are required.

Administrators can now **override the lock on Title Codes**, making it work just like every other locked field in the application.

You can now tell Recruit about your **search committee for basic recruitments**, making it easier to report to your central campus offices and to UCOP on who was on search committees.

Recruitments

The recruitment **description now renders [Markdown](#)** just like comments do, which makes it possible for you to do bold, italics, headers, links, and other stuff on the apply page.

Design

Our links have shed their visual clutter and now go about **free of underlines**. The result is a cleaner look that makes the site easier to navigate.

We've also **removed** the 'Edit Basic Recruitment' and 'Update Online Application Requirements' buttons, just like we said we would. Use those modal editors!

Notable Bugs Fixed

● Inactive recruitments no longer allow applicants to request letters

---

Researcher - Biochemistry and Molecular

Apply Now

Job #JPF00001
● Mint Green Bees - German

RECRUITMENT PERIOD
Open Apr 7, 2014 through Apr 7, 2016
